

Proper Handling & Precautions

BEAKGUARD – WoodPecker Deterrent Coating

For educating new BeakGuard users to the **EXTREMELY** disgusting taste.

About BeakGuard:

1. Ingredients in BeakGuard® have an incredibly unpleasant taste but also have a 50-year safety record in consumer products around the world.
2. Be exceptionally careful – **Do not get in your mouth**
2. Chocolate is the only thing that helps reduce and dilute the horrible taste.
3. BeakGuard is Safe: The ingredients are even used in children's products to stop thumb-sucking and nail-biting, in toys and cosmetics to stop ingestion. Even State and Federal regulations as outlined below:
 - a. FDA- use as ethanol denaturant for cosmetics in US and 40+ other countries.
 - b. State Laws: compliance antifreeze ingestion deterrent agent laws.
 - c. EPA- approved additive used to prevent pesticide ingestions.
 - d. OSHA – required in respirator fit testing for nurses, firemen, first responders.

To Reduce Potential Exposure to the Mouth - Follow these Recommendations Below:

1. EXTREMELY Unpleasant Taste!!! Chocolate will help lessen the foul taste.
2. Always use disposable gloves and eye protection.
3. Recommend wearing a disposable lightweight Tyvek® type suit.
3. Do not touch anything else before clean-up.
4. Handle very carefully to avoid spills or splatter.
5. Clean up by washing hands with soap & water.
6. Rinse hands with 3% Hydrogen Peroxide, which destroys BeakGuard's active ingredients.
7. Use 3% Hydrogen Peroxide to wipe down the exterior of containers, any contact surfaces or other items that may have come in contact with BeakGuard.

** See MSDS for Additional Precautions**.
